

Great Achievements by Teenagers from chapter 18

“You can do whatever you dream of and become inspired if you stay focused, work hard and don’t give up. You will raise above 95% of your classmates” – Randy E. King

Teenagers throughout history have had many great achievements in the fields of art, culture, science and technology. This may be because they are able to think in new and innovative ways, or their thinking is not hidebound by discredited nostrums; it may be attributable to great teachers and great schooling - including homeschooling. It may simply be

the emergence of God-given talent at an early age. Biologically the rate of brain development and according to some studies IQ, reportedly peak in smart individuals just prior to their teenage years.

Achievements, listed by age at which they were made

Age 7 - Yehudi Menuhin gives his first solo violin performance with the San Francisco Symphony in 1923.

Age 8 - Frederic Chopin plays his first public piano performance, having already authored two polonaises (G minor and B flat major) at age 7.
